ENDPOINT PROTECTION

## CROWDSTRIKE FALCON: MAKING THE "IMPOSSIBLE" POSSIBLE

They said it was impossible to provide complete endpoint protection using a single lightweight agent with no impact on user performance. We proved them wrong. With CrowdStrike Falcon's unprecedented real-time visibility, protection and response, **it is now possible to:**

- Prevent both commodity and sophisticated attacks — whether they use malware or not, regardless of whether your endpoints are online or offline.
- Gain real-time endpoint visibility and insight into applications and processes running anywhere in your environment, ensuring that nothing is missed and everything that requires a response, gets one.
- Proactively hunt down advanced threat activity — faster and more effectively than ever before.
- Protect endpoints across all leading platforms, including Windows, macOS and Linux endpoints, data center servers, virtual machines and cloud platforms such as AWS, Azure and Google.
- Retire your legacy antivirus and deploy a next-generation solution that is independently tested and certified as an effective AIO replacement.
